## PROFESSIONAL EXPERIENCE

**HCL TECHNOLOGIES CLOUD COE GLOBAL TEAM ♦ since Aug'17 till date.**

**Deputy General Manager/ Enterprise Cloud Architect**

- Spearheading HCL's Cloud Native Services Practice as a Cloud Migration Strategist with both PreSales and delivery responsibilities. Leading overall technical solution/ validation of Solution Architectures - from presales / inception solution design to implementation governance.
- Responsible for providing architecture thought leadership and expertise in shaping enterprise cloud migration programs.
- Efficiently providing technical guidance in Cloud Readiness assessments of applications, Cloud Native Development and Application Modernization Best Practices and Application Containerization.
- Developing factory model for accelerated cloud migration exercise. Assisting in setting up a fully automated Application Delivery / DevOps approach.
- In a PreSales capacity, working proactively with the Cloud Sales team across geographies to identify potential business opportunities.

### Instrumental in:

- Cloud Solution strategy building, positioning service offerings based on customer's long term and Short-term IT needs.
- Winning several orders on Cloud Migration.

### Highlights

- Successfully steered onsite cloud readiness assessments and value stream analysis for European clients under aggressive timelines and challenging situations and converted it into business proposals/large deals with attractive value proposition for customers.

**HCL TECHNOLOGIES (INDIA BUSINESS), NOIDA ♦ Feb'10 – Jul'17**

**Associate General Manager/ Senior Architect**

- Responsible for the development of technology plans and roadmaps for targeted organization.
- Instrumental in designing Business and Enterprise Architecture along with Strategy for the group.
- Developed delivery teams and provided inspirational guidance & efficient leadership to achieve excellence.
- Engaged with senior client staff, from both a business and IT perspective, to understand and define their needs, and subsequently to define the solution and high-level architecture to meet these requirements.
- Interfaced with the internal product/bid management/Design/commercial teams & External partners to build a specific solution & service design as per customer requirements.
- Provided strategic inputs in managing the end-to-end presales process for clients and partners from Request for Proposal (RFP) responses through to solution defense and tailored product demonstrations/POC to customer.

## Highlights:

As Chief Architect:

- Successfully delivered two large Government Projects in the Power Distribution domain in India. These were non-cloud projects having multiple third-party COTS applications integrated via SOA and having both Intranet and Internet facing Portals. The product Stack comprised of offerings from Oracle, CA, ESRI, Newgen, Cyme, BMC, Liferay, etc.
- Contributed significantly in DC and DR setup at a high level and have worked closely with the Network, Security, Storage and Compute teams. Dexterously managed Software Procurements and Licensing.
- Guided account teams in business development through qualification of mega deals worth INR hundreds of Crores.
